Statement of Need

This activity will address the underutilization of the Osteopathic Tenet "The person is a dynamic unit of body, mind, and spirit." The concept of "spirit" will be explored and related to applications for taking a full history of the patient's life experience and enhancing both patient and physician renewal and resilience reducing "burnout."

Course Description

Viola M. Frymann, DO, FAAO, FCA was a leader in the osteopathic medical profession who frequently wrote and lectured on Osteopathy, the philosophy which underlies and empowers the Osteopathic Medical Profession. This course focuses on the concepts related to "spirit" as from the first tenet of Osteopathy, "The person is a dynamic unit of body, mind and spirit" and "healing" from the second tenet "The body is self-healing."

The presentations in this program elucidate some of the content in Dr. Frymann's lectures and discussion of "Other Dimensions of Healing" she included sometime during virtually all of her basic and intermediate cranial courses. This program also elucidates important distinctions between religion and spirituality pertinent to the practice of medicine. Then we expand the concepts as presented by Dr. Frymann to some contemporary applications which have enhanced the healing possibilities of Osteopathy in the hands and hearts of many who provide osteopathic and healing services to their patients. The program concludes with a panel discussion open to registrant participation.

Educational Learning Objectives

Upon completion of this course, the participant will be able to:

1. Distinguish the differences and similarities in the osteopathic practice context for personal and patient understanding of religiosity and spirituality. This objective will enhance the competency of "Medical Knowledge and Its Application into Osteopathic Medical Practice."

2. To describe Dr. Frymann's application of healing practices beyond and integrated with osteopathic principles and practices, and how this affected her teaching and clinical approaches.

3. Describe the integrative medicine principles related to the osteopathic concept of Body-Mind-Spirit in contemporary medical practice.

4. Identify applications for medical history taking that will include attention to mental, emotional, religious/spiritual aspects and experiences in our patients lives. This objective will enhance the competency of "Interpersonal and Communication Skills in Osteopathic Medical Practice."

Target Audience

This activity is open for all osteopathic and medical physicians (DO/MD), Dentist (DDS/DMD), Medical Student (DO/MD), and International Osteopaths.

Prerequisites

This course is appropriate for the target audience and students in the target audience training programs.
